ORDER BY MAIL AND SAVE

Allred Plum

BEAUTIFUL TO SEE, DELICIOUS TO EAT

Allred is another of Wolfe's new varieties resulting from a never-ending search for new and finer fruits. It looks like a big red cherry and bears showers of sweet, juicy, red-meat plums all over the long limbs. I know of no other fruit that offers beautiful blossoms in the spring, outstanding foliage all through the growing season and so much good eating. Pictures below show the fruit tree in bloom and color of foliage. The leaf is red. The stem and branches are red. The fruit is red outside and inside, and the seed is red. It is All Red. Labeled blue over brown.

STEPHENVILLE, TEXAS

Phone No. 2

Famous Frank

Frankie

A sister to Frank that ripens August 15th. This large, beautiful peach has all the qualities of the Frank with one exception. I would class Frank as a little sweeter tasting peach. Frankie is a heavy producer even during years of late frost and resistant to various diseases. It has a color that sells; rich yellow with bright sun-kissed cheeks. Frank and Frankie make an ideal pair for commercial planting. R. B. Alexander, the oldest and most successful orchardist in the South, told the Number One Peach Association of Texas, in a meeting at Wolfe Nursery: "If I were a young man, I would plant 1,000 acres of Frankie. It is a sure bet." Truckers who come to our nursery to haul Frankie off to market say "It is one of our best shippers." Stay with Wolfe's for pure strain varieties of fruit. Labeled blue.

FRANK

Delicious cling that ripens August 10th. Holds the World's production record. Frank has not missed a crop now in 44 years at Mexia, Texas. It is truly a frost-resistant variety that commercial and home planters are using more each year. One 3-year-old tree here in Stephenville, Texas, set a new record by producing 10 bushels of large Frank Peaches. Growers are making from \$300.00 to \$500.00 an acre from this heavy bearing, pure strain of Frank variety. It is a beautiful, sweet, acid-free, juicy flesh peach that is resistant to brown rot and an excellent shipper. Frank will prove to you that "Money Does Grow On Trees." Farm and Ranch says: "The most outstanding peach produced in the Southwest." For the genuine Frank get it at Wolfe's. Labeled white.

W. P. Burg of Stonewall, Texas: "I sold \$500.00 worth of Frank Peaches from one hundred 3-year-old trees. Mr. Wolfe's trees would be cheap at five times their present cost. We commercial growers cannot afford to buy unproven nursery stock."

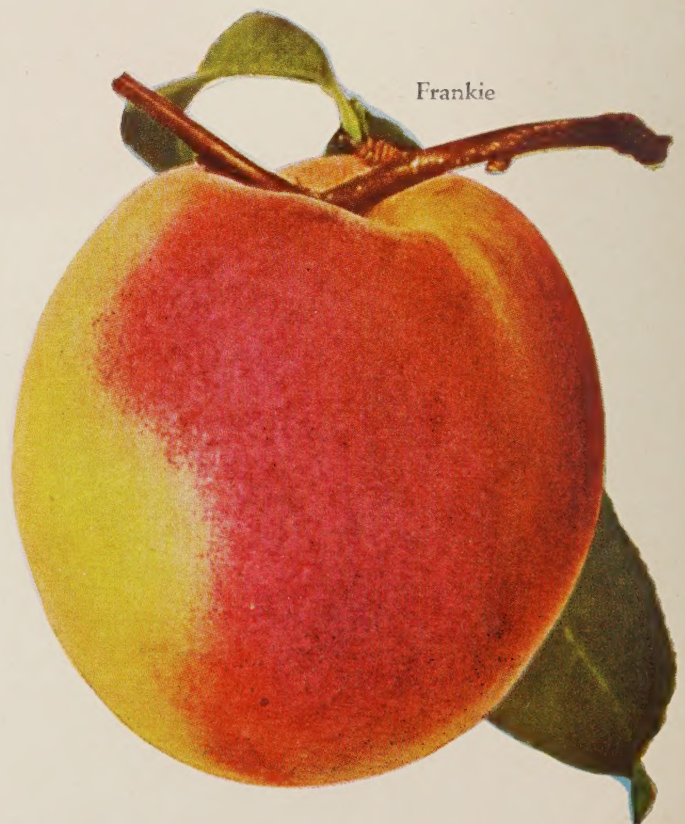

Wolfe's Special

TEXABERTA

The World's Most Perfect Peach

A perfect freestone that ripens July 10th. This grand peach has not missed a crop at Belton, Texas, since it was originated 20 years ago. Combine the best qualities of all peaches, add a few and you have Texaberta. It is really a peach of a peach. In addition to being frost resistant, it is practically free of brown rot when common varieties are a complete failure. It has dark red flesh around the seed, forming into deep yellow toward the skin and one of the most delicious peaches you have ever eaten. I sent a bushel of Texaberta to some friends in West Virginia and they couldn't believe such a delicious peach was being produced in Texas. It grows well in mild climates where Elberta is a failure, bears very young, is an excellent shipper and commands top prices. Labeled brown.

Order Offer No. 1.

Melba (Improved Pallas)

Truly one of my greatest finds in fruit varieties. It is a freestone that ripens here about June 5th and will ripen in the valley and coastal areas about 15 days earlier. If I just raised 1 peach it would be the Melba. The large white fruit hangs on the tree until dead ripe and its honey flavor cannot be equaled by any other peach. It is a cross between the Honey peach and some of our larger white varieties. The size is about that of Elberta with the flavor of honey type peaches. This variety will make peach history in the Texas valley and now that the State Department has authorized citrus growers to plant early varieties of peaches the demand is by far greater than we are able to supply. Mr. O. M. Bish of Mission, Texas, drove to our nursery and after eating a few of the Melba peaches ordered 16,000 trees. It would pay commercial growers to drive to Mr. Bish's place and see this grand fruit. Regardless of where you live, if you just plant 1 tree, plant Melba. Labeled gray.

Melba

Wolfe's Pure-strain Peaches Bear Young and Heavy

Frost Resistant Varieties are our Specialty

NEW ELBERTA

A yellow freestone that ripens about June 20th. Just as the name implies, this is a new Elberta that beats all other peaches of its class to the market. Commercial growers have welcomed this variety as a precious gift to early marketing. Take my word for it and plant a peach that will make you say that "Money Does Grow On Trees." It frequently bears 2 years after planting and produces heavy crops. The scarlet-red color of the fruit is so brilliant that it can be seen from a long distance. The meat is very fine with a seed almost as small as Texaberta. Wolfe's New Elberta usually bears when other peaches fail. For pure strain varieties that are labeled before they are dug depend on Wolfe's. Labeled pink.

Three 18-24 inch New Elberta Peach trees, one-year-old, prepaid to you for only \$1.00. Offer No. 2.

HALEHAVEN

Freestone, ripens June 25th. Cross between South Haven and J. H. Hale; large, beautifully colored, yellow-fleshed peach. Splendid shipper. Heavy producer and brings top prices. Second only to Elberta in popularity! Halehaven is one of the finest shipping and canning peaches grown. Every peach is a big handful of delicious, tempting goodness. Juicy, bright colored, and with a flavor you will never forget. Halehaven has deep blushes of red nearly covering the surface. Brilliantly colored long before ripe; ripens fifteen days ahead of Elberta at a time when market pays highest prices for peaches. Freestone, perfectly self-fertile. Extremely hardy, prolific and pollenizes other varieties. Labeled black.

PRESIDENT ROOSEVELT

Freestone. Ripens June 20th. It is similar to Texaberta in size, color, size of seed, flavor and shipping qualities. This big yellow freestone ripens just after Early Wheeler and seems to be extra **frost-resistant**. The big delicious peaches hang on the tree remarkably well after they are ripe. We recommend it highly. Labeled 2 yellow. Prices, page 3.

New Elberta

Halehaven

Roosevelt

Our Shipping Season Starts in December and Closes About April 10th.

Wolfe's

Grand Champion

Giant Hale

Wolfe's
Giant
Hale

WOLFE'S GIANT HALE

Freestone, ripens July 15th. Is a **Grand Champion** in all shows. The huge dark red Hale demands instant attention at all markets and sells like hot cakes at good prices. You can easily expect to get more per bushel from Wolfe Giant Hale than any peach in your orchard. See the half bushel basket of the State Grand Champion Hale above. Labeled yellow.

Attention, Commercial Growers

If you are interested in quantities of more than 100 of any one variety, please write for special commercial prices. Remember, we absolutely guarantee our trees to be true to label. You can't go wrong when you start right with our pure strain varieties.

ELBERTA CLING

Clingstone, ripens July 5th. This beautiful yellow Elberta is becoming more popular with growers each year. It is much larger than the old Elberta and has an outstanding trade value. The peaches are well shaped, hang on the tree well and are ideal for shipping. The trees are strong growers which makes it disease resistant. I have several of these trees producing in my own orchard and find it a most popular peach on the market. A steady dependable peach that will always make the United States number one grade. Plant Elberta Cling in your orchard. Labeled red.

EARLY WHEELER

Cling, ripens June 5th. Peach we sell for Early Wheeler is sold by Stark for Red Bird Cling. It is better colored and has the same size and shipping qualities. Labeled 2 brown.

COMPLETE HOME ORCHARD

8 choice 1-2 ft. peach trees selected by Ross Wolfe so that you will have peaches ripening constantly from May through August. Here is what you get; such varieties as Mayflower, Early Wheeler, Hale Haven, Giant Hale, Elberta, Indian Chief, Frank, President Roosevelt, Surprise. Postpaid for **\$24⁹**
Offer No. 4B

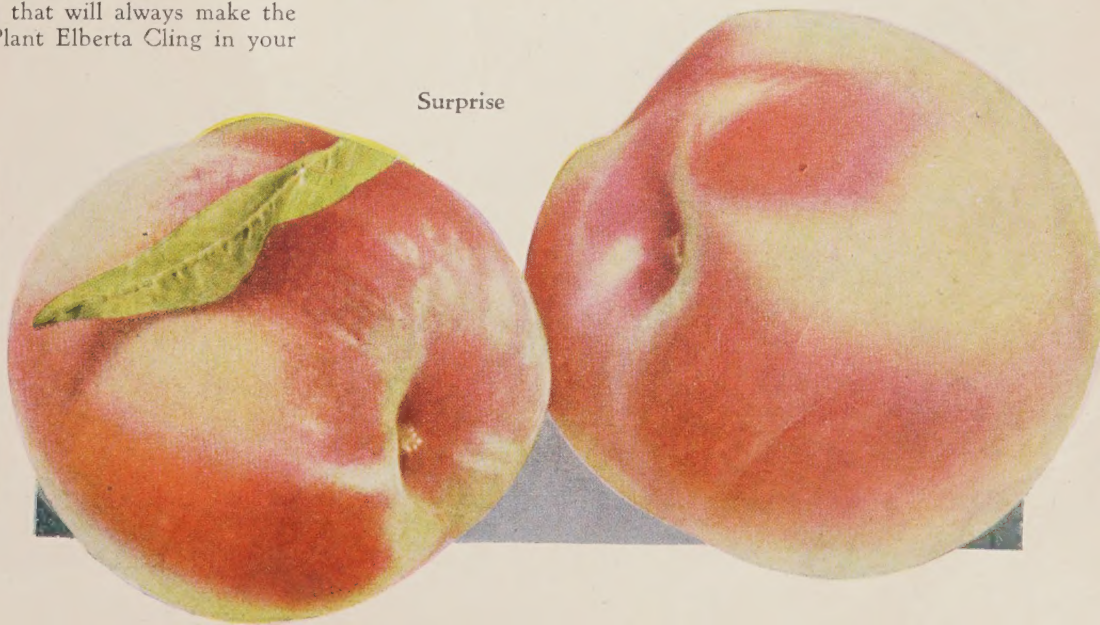

SURPRISE

Cling. Ripens October 20th. Good for eating, canning, pickling, preserving and commercial purposes. Due to its fine quality, color and time of ripening, it has a great future as a valuable market variety. Labeled 2 black.

PEACHES.

**STAY WITH WOLFE AND GROW PEACHES
THAT REALLY MAKE A HANDFUL**

INDIAN CHIEF

Big pickle cling that ripens about July 20th. I will give a \$100.00 reward for a better Indian Peach than the one shown here. As you can tell by the hand full of peach shown above, it really is an outstanding variety. I have three of these peaches in my office that completely fill one-half gallon jar. Mrs. Wolfe says it is one of the finest pickling peaches in the land. A 23-year-old tree here in Stephenville is still healthy and bearing the finest large, red-fleshed, red-skinned peaches I have ever seen. All the buds I use in propagating peaches are taken from orchard proven trees and labeled so that I can absolutely guarantee true-to-name varieties. Labeled orange.

WOLFE'S ELBERTA

A huge freestone that ripens about July 10th. This big yellow peach usually needs no description because Elberta is the most widely known peach in the world, but, I want to call your attention to my pure strain variety. I have taken great care to see that the buds I use come from heavy bearing orchard trees and that they are labeled in the field so that varieties cannot be mixed. My improved strain of the orchard variety bears heavier, more regular and is a much better tasting Elberta. I class it third to Texaberta and Frank on the market. Labeled green.

Ross Wolfe's INDIAN CHIEF Special

This is the old-time Indian Peach we knew when we were boys. Three strong, heavy-rooted, 18-24 inch, 1-year-old trees, prepaid for only \$1.00.
Order Special Offer No. 4A.

MAYFLOWER

Semi-cling, ripens May 25th. Earliest peach on the market and valuable for home or commercial purposes. It is medium size, creamy-white skin, mottled with dark red; juicy and very delicious. Labeled 2 white.

CARE OF TREES UPON ARRIVAL

Open the bundle and put the trees in water for about two hours. Plant them as soon as possible. Plant about one inch deeper than they grew in the nursery row. Do not use fertilizer until trees have full leaves. Water the soil well around the roots and prune about one-third off the top. Stay with Wolfe Nursery for correct information on how to make a success out of your planting.

SPECIAL OFFER No. 5

Hardy Cherries

The cherry is America's favorite fruit for all-around, year-round delicious eating. Pies and sauce when they're fresh. Preserves put away for a long winter. And, best of all, canned cherries so you can have those luscious pies throughout the year.

WOLFE'S NEW BUSH CHERRY

Beautiful dark red fruit that is excellent for jellies, jams and pies; it is **frost-resistant**, a sure and abundant bearer. This is a **new** variety sold **exclusively by Wolfe**. Ripens about August 1st, will bear the second year after planting and will continue to bear very abundantly every year. A new variety for the Southern States that will make money for you. Order early as the supply is very limited. Beautiful for landscaping. Labeled white over red. Price: 1-year plants, each 75c.

Wolfe's New Bush Cherry Offer

Three Wolfe's Bush Cherry, 1-year plants, prepaid for only \$2.00.
Order Special Offer No. 10.

HANSEN BUSH CHERRY

Dark red fruit that is excellent for jelly, jams and pies. Frost-resistant, sure and abundant bearer. This is a new variety. Ripens around June 1st. Bear the first year planted and will bear every year. Plant a row of these bush cherries in your yard or mix them with shrub plantings. Shapely, low-growing bushes, have silver-green leaves which turn red in autumn. A glow of dainty white flowers in the spring, both practical and ornamental, will bear in sections where other cherries fail. Order early—supply limited. Prices: 2-year plants, 75c each, prepaid. 3-year plants, 95c each, prepaid. Labeled white over blue.

Hansen Bush Cherry Offer

Three Hansen Bush Cherries, 1-year plants, prepaid for only \$1.00. Order Offer No. 10-A.

MONTMORENCY

Bright red, delicious flavored cherries with firm flesh. Acclaimed America's greatest canning cherry. The tree is hardy and disease-resistant, less affected by wet weather. Young, sure bearer. Labeled white over green.

EARLY RICHMOND

The leading early sour cherry of the Nation. The fruit is bright red, juicy and excellent for pies. Ripens about June 15th. Trees are strong and produce very young.

PRICES ON MONTMORENCY AND EARLY RICHMOND

Home and Market Plums

MUNSON

When I tasted the Munson Plum, I said it was as sweet as honey and as yellow as gold. It gets ripe June 1st and should be in every planting. This is our greatest Plum. Labeled blue over gray.

GOLD

Ripens July 1st. Large yellow Plums with excellent flavor. Thrifty symmetrical trees, firm flesh, clingstone. Labeled blue over yellow.

AMERICA

Ripens June 20th. Thrifty, symmetrical, spreading tree with medium to large fruit that is a bright golden color with pink cheeks. Firm flesh, clingstone. Labeled blue over white.

BURBANK

Ripens June 25th. Large, clear, purplish red, flesh deep yellow, sweet flavor. Very prolific. A great Plum produced and named for a great man. Labeled blue over green.

BRUCE

This is one of the best plums that grow in the South. The tree is very healthy, early to bear and produces loads of red plums nearly as large as hen's eggs. It ripens in early June, and growers who shipped it in carloads from Texas to New York, report it retailed for \$8.00 per bushel. Labeled blue over red.

Opata Plum Cherry—Heavy Bearing

OPATA

Ripens the last of June. Also an extra heavy producer. Tree is very beautiful when in bloom and very fragrant. Medium size fruit, purplish red, splashed with green; flesh light green and fine flavored . . . completely covers the long limbs. Clingstone. Labeled blue over orange.

SAPA

Ripens last of June and a tremendous producer. Dwarfish, thrifty and often sets fruit at one year of age. Fruit medium in size, dark with greenish splotches; flesh rich dark purplish red, rich flavor with small seed. The best jelly plum on the market. Labeled blue over pink.

Sapa Plum Cherry

Wolfe's *Miracle Tree!*

FIVE DIFFERENT KINDS OF FRUIT ON ONE TREE

Peaches, Nectarines, Plums, Apricots, Plum-Cherry

Can you picture one tree bearing five different kinds of fruit and all of them ripening at about the same time? Believe me it is a beautiful sight and is really a novelty. In addition to good cross pollination you get our best varieties; such as Elberta, Red Nectarine, Allred Plum, Cluster Apricot and Opata Plum Cherry bearing on the same tree. The foliage of the different varieties will make a beautiful combination and one that you will be proud to show all visitors. The Miracle Tree is difficult to grow but our horticulturists have finally succeeded and you may rest assured that it will do well in your particular section. Labeled 2 green.

Dear Friends and Customers:

It is a pleasure to hand you my new catalog and to know that with the war over I will be able to render a more complete service than during the past 4 years.

In sending you this catalog I offer a list of the finest fruit and nut trees, flowering shrubs, evergreens and bulbs in the Southwest. My life has been devoted to the nursery business and I have made every effort to render the kind of service that you good people are entitled to.

I feel fortunate in having the advice and contributions of such great plant breeders as the late E. E. Risien, wizard in producing fine papershell pecans, the late T. V. Munson, world famous for his grape culture, and the late J. W. Stubenrauch, originator of heavy-bearing, frost-resistant peaches.

Our stock is grown in select, fertile soils under ideal conditions and propagated with most modern methods. Our new system of labeling by color in the field enables us to absolutely guarantee pure-strain, true-to-name varieties.

You and others pay the checks that keep this nursery growing and believe me, we are going to turn handsprings to give you more than value received, both in nursery stock and additional service. As your nurseryman I will always faithfully do the task of giving Texas and the great Southwest my best in order to make our homes more beautiful and fruitful.

Gratefully yours,
ROSS R. WOLFE.

Money-Back Guarantee

All of our stock carries a money back guarantee. If you are not completely satisfied, notify us within 10 days after receiving shipment and your money will be cheerfully returned. Our stock must reach you in perfect living condition, as described in this catalog and entirely satisfactory to you. We do not guarantee trees to live. That invites careless handling by the purchaser and we want you to treat your trees with the best care possible. Our trees will be true to label and any that should prove otherwise will entitle you to receive double the purchase price. Stay with Wolfe for pure strain young and heavy bearing varieties.

True-to-Name Varieties

A new customer service has been added. Now more than ever you can depend on Wolfe Nursery for pure strain true-to-name varieties. We bud from proven bearing orchards, take the buds direct to our nursery field double labeled and immediately labeling the budded rows with color on the trees. Before the tree is dug, each variety is labeled with a different colored stripe about 4 inches above the ground. This is truly a permanent label that will enable you to identify your trees when they come into bearing. Keep your catalog and label chart. Your order will be acknowledged by sending a color label chart with free planting guide and other necessary information. You will notice that all varieties of fruit and nut trees are labeled by color and are so indicated at the end of each description in this catalog. Stay with Wolfe for true-to-name varieties.

We Pay Postage

Please note that most items in our catalog are delivered to your door postpaid. However, some of the trees are too large to ship by mail and must be shipped Express collect. Where part of your order is Express

and part Mail, it will be shipped by Express in order to avoid making two separate shipments. For the privilege of shipping by Express, we will include extra stock that will more than pay for the Express charges.

If your order is received late in the year, it is likely to be substituted with like varieties in order that your shipment may be packed complete. If this provision is all right by you, please check on our order blank.

Please No C.O.D.'s

We are happy to have your order any way that you desire to send it, but to avoid unnecessary trouble and expense on your part and speed delivery, we are asking that all orders be accompanied with check or money order.

Due to the scarcity of labor we cannot accept any order for less than \$1.00. All orders will be shipped as soon as possible after they are received. We like to get orders out the same day that they are received, but sometimes unavoidable situations prevent us from getting stock in out of the fields.

Nursery Stock

Federal and State Approved

All of our nursery stock is carefully inspected and certified to be apparently free of injurious insects and diseases before we ship. In addition to this inspection, we inspect all nursery stock when it is dug, as it goes through the processing room, and when it is gathered out of our shipping room. Your order will have been inspected at least five times before you receive it. Each bundle of stock is carefully packed with a special paper and packing material so that it will reach you in perfect condition.

Helpful Planting Guide with Every Order **FREE**

Our aim is to help each Wolfe customer get the best possible results out of the nursery stock received. Follow the advice of our planting chart and you will be surprised at what fine fruit and beautiful flowers you can grow. Our planting guide is written by experienced horticulturists and is in concise simple language that is easily understood by all. We want each customer, regardless of how much you purchase, to have a copy of this planting guide and we are sending it in advance so that you will be able to prepare for your trees and plants when they arrive. Any information that you need, not contained in this planting guide, will be sent to you upon request.

OUR SHIPPING SEASON STARTS IN DECEMBER—CLOSES IN APRIL

John Garner

*Will Outbear
All Other Pecans*

Plant your pennies and watch your dollars grow. It does not take a John Garner Pecan long to grow dollars out of pennies. I have fruited this great pecan alongside of many, many other varieties during a period of fifteen years and it has made more money than any other. I have never been able to supply the demand.

WOLFE'S JOHN GARNER PECAN

The very finest pecan grown and will bear one-third more per tree than any other pecan. Garner produces nuts the first or second year after you plant them because our "YOUNG-BEARING" system makes them bear in the nursery rows. Garner is FROST-RESISTANT and one of the first pecans on the market. Everyone says it is the most beautiful pecan grown. It is the only true paper-shell—so thin it can be cracked with the fingers. The creamy, delicious kernels are extremely rich in oil, proteins, carbohydrates, vitamins and distinctive flavor. Plant in uplands of sections only at altitudes of **600 feet and up**, on account of pecan scab, which attacks it in lower altitudes. Labeled red.

JOHN GARNER PECANS—THEY PAY

Note this beautiful pecan; what a thin shell, how perfect the big kernels, and the ideal shape. John Garner is about one-third larger than pictured above.

SOLD ONLY BY WOLFE

PRICES OF JOHN GARNER PECAN TREES

PLANT YOUR PENNIES AND WATCH YOUR DOLLARS GROW

Pecans are an investment that will pay big dividends the rest of your life. A small investment in a pecan grove will make money for you and for generations to come. Put pecans in the proper soil and they will immediately double the value of your land.

**Our Shipping Starts In December and
Closes About the Middle of April**

Young Garner Bearing Over 100 Lbs.—Three Will Pay the Taxes On Your Home

GIANT MAHAN

MAHAN—WORLD'S LARGEST PECAN

Can you imagine a pecan so large that the nuts in the green clusters look like bananas on a tree? The nuts look like Schley but they are more than twice as large. It is a true papershell and brings more money per pound than any other pecan.

I recently visited the United States Pecan Experiment Station at Shreveport, Louisiana. Their production records shows Mahan has averaged more than twice as many pounds as Stuart, Schley or Success. The Mahan sells for a higher price than any other nut on the market.

This variety has become increasingly popular due to the healthy, vigorous growing tree which makes one of the best shade trees grown due to its symmetrical-shaped top and the large, dark green leaves. Added to this feature, its high production of the largest nut grown makes it the most popular pecan on the market. While the nuts sometimes fail to fill, the kernels are always good. Adapted to all sections. Labeled white.

Wrap the trunks of pecan and walnut trees the first summer to protect against sun.

How to Plant Pecan Trees

Dig holes for pecan trees approximately 42 inches deep and 36 inches square. Put the pecan in, making sure that it is in the ground as nearly the same depth as it was while standing in the nursery row. Fill in around the tree with leaf mold or top soil, being sure that sufficient water is added so that the dirt will all be settled in around the roots of the tree. Do not fertilize the first year.

Western Schley

WESTERN SCHLEY

The perfect cracker. As the photograph shows, it is a long, well-shaped, beautiful nut. The shell is thin and soft. The tree is remarkably healthy, strong grower, early and heavy producer. Western Schley is a Genuine Risien Gold Medal Pecan and **remember**, they bear young—even in the nursery row. Labeled green.

BURKETT

The Burkett is and will continue to be the leader of western varieties. Its flavor cannot be equalled. It is a regular producer of large, fat pecans that bring top market prices. As long as we have been in business, the market demand for Burkett pecans has never been supplied. Plant Western Schley and John Garner with Burkett for perfect pollination. Plant only in altitudes above 600 feet. Labeled blue.

PRICES ON BURKETT, WESTERN SCHLEY, SUCCESS AND STUART PECAN TREES

CHINESE CHESTNUT TREES

Imagine eating a big plump brown Chinese chestnut from your own tree. This new seedling chestnut is not affected by blight and will furnish you with lots of nuts. The Chinese chestnut makes a beautiful round spreading tree and will grow 18 to 24 feet tall. We do not recommend it west of Stephenville but will do well in the Eastern section. **Price:** 1-year-old trees, \$1.65 each; 3 for \$4.25.

WOLFE'S PAPERSHELL PECANS

Delicious Eating and a Handsome Income for the Rest of Your Life — Plant Now for Independence

What are you doing to provide for future income? You are growing old, your health may not always be good, and some younger person may get your job. You can be happy and contented by owning your own home and having a good income from a pecan orchard that will grow independently more valuable each year for hundreds of years. If you are on a salary it will be good insurance to lay aside part of your earnings as an investment in a good pecan orchard. Contribute to the happiness and the upkeep of yourself and your family.

Success

SUCCESS

This most popular Eastern variety is in demand. The nut is very large and oblong, with plump, smooth, creamy kernels that release perfectly from the thin soft shell. The tree is a vigorous grower and resistant to scab. It ripens after Stuart.

Forty nuts usually make a pound. One of the heaviest kernels of all pecans. Low headed spreading tree with nice foliage. Labeled gray.

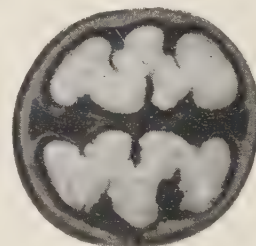

Distance for Planting Pecan Trees

35x35 ft.	gives 35 trees per acre.
40x40 ft.	gives 27 trees per acre.
35x70 ft.	gives 17 trees per acre.
50x50 ft.	gives 16 trees per acre.
60x60 ft.	gives 12 trees per acre.

STUART

The Stuart comes nearer to being well suited to all sections of the country and all soils than any other variety. It is a good producer and a hardy, fast growing tree. The meat is sweet and brittle. It is one of the earliest ripening of all the large standard pecans.

Vigorous trees. Bear regular. Resist scab, early and heavy bearer, large well-filled nuts. Labeled yellow.

Stuart

Money DOES Grow on Trees

ENGLISH WALNUT

GRANDE ENGLISH WALNUT

A new English walnut for the Southwest that is a sensation. The tree makes a beautiful shade for the home grounds.

The bark of Grande is very light in color, and the huge, bright green leaves lend an ideal atmosphere for a shade tree. We do not recommend our English Walnuts in cold climates.

HELP YOUR TREES LIVE

Wrap the trunks of Pecan and Walnut trees with burlap or heavy paper during the first summer to protect against hot sun.

Wolfe's Grande English Walnut

Three-year-old Thomas Black trees growing in my orchard loaded with big black walnuts that look like baseballs hanging on the tree. Note the large amount of walnuts for such a small tree.

*World's Heaviest
Producer ~*

Thomas Black Walnut

Thomas Black is a walnut that will grow most anywhere in the United States from coast to coast. As pictured at the bottom of the page it is truly an outstanding black walnut. The picture on the left shows the comparatively thin shell with the big delicious kernels. The center picture is a Thomas Black showing how easy they are to get out of the shell and the picture to the extreme right shows the whole kernel. This past year we kept plenty of Thomas Black nuts so that people driving to the nursery could sample them. Everyone who tasted this distinctive walnut said it was really an outstanding variety. Thomas Black starts producing big walnuts right in our nursery row and young trees in our orchard are heavily loaded every year. The tree is a thrifty grower and makes an ideal shade or orchard tree. Nearly every order we receive has at least one Thomas Black walnut. Labeled two reds.

TEXAS NATIVE WALNUT

A grand walnut, widely known and very hardy. The trees grow to immense size and bear heavy crops regularly. The nuts are delicious and keep for a long period of time. Ideal for a shade tree that brings in profits. Labeled two whites.

PERSIMMONS

A Dish Fit For a King

Leading fruit of the lower South. Our demand for fine bred Japanese persimmons is increasing beyond our ability to supply the trees. This year we have tried to propagate enough to take care of your needs. Persimmon trees bear very young, every year and the fruit is most ornamental, delicious and has a top market value. I know of no more beautiful sight than a large persimmon tree loaded with bright orange fruit. Persimmons ripen in October and November. Beautiful for landscaping specimens.

TANE NASHI. Seedless. Finest quality to be had. Looks like a picture. It bears young and is **frost-resistant**. We have picked Tani Nashi when snow was on the ground. Best seller. Plant trees 20 feet apart. Labeled yellow over red.

EUREKA. Hardy variety; fruit looks like a huge red tomato. Very soft and makes a dish fit for a King when served with lemon juice, sugar and cream. Almost seedless. Ripe November and December. Labeled yellow over white.

DELICIOUS APRICOTS

PERFECTION. Blooms late and ripens early. The fruit is the largest grown and the tender delicious meat is ideal for home use. Many of our Apricot trees bore fruit in the nursery row this year. Labeled green over red.

IMPROVED CLUSTER. Medium to small, light orange-yellow, flecked with red; flesh tender, juicy, sweet, and of good quality; productive. Labeled green over white.

MOORPARK. Large, yellowish green with brownish red on sunny side, marked with dark specks; flesh bright orange; separates readily from seed. Grown largely for commercial purposes, especially for canning and drying. Tree vigorous and prolific. Labeled green over blue.

Wolfe's Tasty Figs

EAT 'EM THIS YEAR

You can grow figs in your garden, around your home, against your garage, in the orchard, or on a terrace and have delicious eating figs all summer long the first year. Figs are the most healthful fruit grown and every family should have three or four fig plants for plenty of fresh figs.

OFFER No. 12—Four 1-year FIGS. Postpaid only \$2.00.

WOLFE'S EVERBEARING FIG (RAMSEY). Ripens its fruit from July until frost and each tree will produce fruit first year. Bears on its new growth. Light straw to brown in color, medium size and very sweet. Does not crack easily. La Reunion Orchard of Grand Prairie made \$1,600.00 from 4 acres of this fig in 1 year. Wolfe's Everbearing Fig (Ramsey) is extra good for preserves or eating fresh.

MAGNOLIA. It is not necessary to plant 2 varieties of figs for good results. The Magnolia produces large brownish straw-colored fruit and will bear the first year after planting. We offer only the best varieties in all fruits.

Holland

The Wonder Apple

Sold only by Wolfe

This horticulture wonder that originated at Weatherford, Texas, was called to my attention by Mr. R. B. Alexander, one of the largest and most successful fruit growers in Texas. The Holland apple has been a consistent and heavy producer for 32 years. Its outstanding commercial advantages are: (1) The fruit is firm, good packer, shipper, and one of the most delicious apples grown. (2) It ripens about August 1st and is on the market before outside apples are shipped in. (3) It hangs on the tree exceedingly well, giving the grower a longer period for selling. Labeled orange over red.

Double
Red Delicious

Golden
Delicious

Wolfe's **APPLES** that Produce Heavy Crops in the South

DOUBLE RED DELICIOUS

This is the King of the red eating apples grown from coast to coast with equal success. Can be picked early and marketed while firm and bruise resistant. Wolfe has the pure strain. Ripens in September and October. Use King David, Holland or Golden Delicious for pollination. Labeled orange over black.

GOLDEN DELICIOUS

This golden apple is just like the Double Red Delicious except it is gold in color. Its mild, juicy, sweet, crisp, white flesh gives it a flavor all its own. Richly fragrant and appetizing. Labeled orange over white.

JONATHAN

We cannot praise this apple too highly. It is one of the firmest, finest, best flavored winter storage varieties, bears young and heavily. A deep red all-purpose apple for any section of the country. Ripens about the middle of September. Labeled orange over blue.

ANOKA

(The youngest bearer of all apples.) Often starts fruiting the year after planted. Red and green striped, sub-acid, eating and cooking type. Crisp, white flesh. Ripens in early summer, bearing an enormous crop every year. Anoka will stand the coldest climates and most adverse weather conditions. Adapted to most any soil. Pollinizes other varieties. Labeled orange over pink.

King David

Stayman's Winesap

STAYMAN'S WINESAP

Winesap is one of the most widely distributed and best known American apples. It thrives on both the Atlantic and Pacific seaboard. The trees are thrifty, hardy, young, and regular bearers when given proper cross pollination. The apple is a medium size, dark red color, firm and juicy, and is the old favorite winter storage apple. Labeled orange over green.

KING DAVID

Mr. J. Frank Browning of Baird, Texas, the largest apple grower in this section, places King David and Holland at the top of his list for money makers. King David gets ripe in August and sells like hot cakes. King David and Golden Delicious are good pollinators for Delicious. An orchard of Holland and King David properly cared for, will net \$100.00 to \$300.00 per acre. Labeled orange over yellow.

RED JUNE

(Extra Young-Bearing Tree.)

Brilliant, glorious deep red summer apple of small size. No other summer apple can compare with it in size and beauty. A favorite in home, local and commercial orchards. Ships well. Commands high prices on the market. Labeled orange over gray.

Fall Off This Tree

Wolfe's Douglas

Bartlett

Wolfe's Pears

DELICIOUS—EASY TO GROW

DOUGLAS PEAR

Douglas will put that **ringing** noise back in your pocket-book. Douglas ripens early, about the last part of August, and is the youngest and heaviest bearing variety that we have to offer. Two- and three-year-old trees are often loaded with a big, soft, juicy, delicious fruit that is without a doubt the best eating pear on the market. It is blight resisting and is fast taking the lead as a commercial variety. A few acres of Douglas will make you independent. Labeled black over yellow.

KIEFFER PEAR

A large yellow pear with red cheeks, russeted with white and rather coarse flesh. A market or kitchen variety that thrives further south where other varieties fail. The tree is very hardy and vigorous; it is also blight resistant and can be stored for the winter. Labeled black over red.

Kieffer

BARTLETT PEAR

Ripens last of July or first of August. A late commercial variety that is good for dessert and canning. It is a very large, clear yellow fruit, with a blush of red on the sunny side. The flesh is white and fine grained, juicy and sweet. The trees are vigorous and very productive. Our pure strain Bartlett has proved to be one of the best money-making varieties. Plant only in altitudes of **600 feet or more**. Labeled black over white.

GARBER PEAR

Garber is similar to Kieffer, and ripens in August. The tree is healthy and bears very heavily. It is an ideal canning and eating pear; very delicious to eat right off the tree. Labeled black over blue.

LECONTE PEAR

This is a middle sized, bell-shaped pear with creamy white flesh, covered with a yellow tough skin and a red cheek. It is a very good eating and cooking pear that ripens as early as the middle of July. Labeled black over green.

Klondyke

KLONDYKE

The perfect strawberry for home or market. The berries are uniform in shape and size, beautiful dark red color with a distinctive mild delicious flavor. A strong, productive bearer that sells for fancy prices. Plants make quick growth, are tall and compact, strong and healthy. The improved Klondyke is bred up and is more productive than the original Klondyke.

We ship Strawberries starting about November 10th.

Wolfe's Strawberries

A BARREL OF STRAWBERRIES AND A BARREL OF FUN

Barrel of strawberries and a barrel of fun. Now that the war is over, pick up a hobby and have yourself some fun. May I suggest a barrel of strawberries? You can have strawberries for breakfast twice a week if you will get this bargain offer of 50 healthy strawberry plants for only \$1.50. Bore 40-inch holes in the side of a barrel and set 10 plants on the top. Use just ordinary top soil and set the barrel where it will be in the shade in the hot afternoons. Bore a few small holes in the bottom for drainage. Keep the long runners pinched off and then serve the big delicious, clean red strawberries for your family's breakfast.

\$1.50

25 Klondyke and 25 Blakemore. Pre-paid.

OFFER No. 13.

Giant Gem -

The Giant Gem is fast becoming the most popular everbearing variety because of its heavy production. Almost every place strawberries are being grown the large, firm, bright red berries are of a very high quality. They will start bearing 60 to 80 days after planting and will produce large crops of berries until frost.

Gem

Everbearing

[22]

Easy to Grow Good Money Crops

TEXAS RANGER

This new berry is the better berry to plant, because: (1) It produces 25 per cent greater than most varieties. (2) It is a better shipper. (3) It produces twice as many plants. (4) It is more vigorous. (5) It is thought to be more **drought-resistant**. (6) It has much deeper and more inviting color. Read what Dr. S. H. Yarnell, head of the Horticultural Division, Texas Experimental Station, says about Texas Ranger strawberry: "The new Texas Ranger strawberry, originated by Mr. E. Mortensen and released by the Winter Garden Substation of the Texas Agricultural Experiment Station, has been found by Experimental test and by commercial growers to excel both Klondyke and Missionary."

HOW TO PLANT STRAWBERRIES

Strawberries should be planted on ridges 6 to 9 inches above the bottom of the furrows so as to insure drainage from wet land. Plants should be set immediately on arrival and if this is not possible the roots should be dipped in water and kept protected until planted.

BLAKEMORE

More than twice as many acres are planted in Blakemore than any one variety; in fact, 25 per cent of all commercial strawberry acreage is in Blakemore, even with scores of varieties being grown. Blakemore is the best early shipping berry the Southern states ever had. It is a strong, vigorous grower and stands abuse and neglect. The berries are firm and ideal for long distance shipping. They ripen uniformly having a bright and attractive color, being medium to large in size.

Dug Right, Packed Right, Shipped Right

I have tested and observed hundreds of varieties in my Rose gardens and trial ground. After careful study I have eliminated a lot of good Roses in order to offer you only varieties that are outstanding for blooms, excellent colors, vigorous growth, hardiness and long lived. My Roses are budded on Multiflora

FRANCES SCOTT KEY. A beautiful deep red Rose with long stems and perfect buds.

EDITH NELLIE PERKINS. Long pointed buds, double blooms of large size. The outside of the petal is a beautiful red shaded with orange and the inside is a gorgeous salmon-pink.

DUPONT. A gorgeous large yellow Rose with long-pointed buds that perfume the garden from early summer until late frost. The prize winner at all shows.

E. G. HILL. A deep red Rose that is a heavy bloomer over a long period of time. Healthy, vigorous grower.

EDITOR McFARLAND. This lovely, fragrant, dark pink Rose has long stems and perfect blooms. The finest pink Rose I have produced.

One Million Dollars Couldn't Buy a Better Berry than *Rossberry*

ROSSBERRY *has Everything*

ROSSBERRY has everything and promises to be the sensation of quick freezing. It's huge in size, and has the combined flavor of Raspberry, Loganberry and Blackberry. It fruits first year after planting and withstands cold and drought. It is remarkably free from disease. Such few seed it has are soft and small. It is now being grown in over sixty Federal and State Experiment Stations. It is the first berry to ripen and a heavy producer. Growers say that it will produce twice as many berries per acre as any they have grown and brings more on the market.

Rossberries as They Grow—Easy to Pick

In quest for new and better varieties, I consider Rossberry one of my greatest finds. As told by the original grower, it was created by Luther Burbank and went undiscovered as a commercial berry for many years. It has now been tried along side of leading berries and without any question it is superior in every respect.—ROSS R. WOLFE.

"I have ten acres of Rossberries in bearing and I have never grown a bigger money maker."—J. B. SMITH.

Clint Boyd, with three acres, says: "Rossberries are superior to any other berry I have ever grown."

"I have spent my life growing berries and the Rossberry is the hardest and best of all berries."—ED GIRARD.

"So much better than Boysenberry that I have dug and reset with Rossberries."—PATE MARTINDALE.

Giant Boysenberry

This amazing new berry is huge . . . about one by two inches in size and has an amazingly rich flavor that makes everyone want more. Boysenberry is FROST-RESISTANT and DISEASE-RESISTANT.

It is sweet and juicy, yet amply firm to withstand shipping to market. It is ideal for freezing, and so far the supply of berries is not nearly equal to the demand for this choice, frozen delicacy.

Boysenberry is a sensational new fruit introduced in California. It is a cross between the loganberry, raspberry and blackberry. Imagine, if you can, a berry combining the best of these fruits in one giant, gorgeous wine-colored berry, with a distinct and delicious flavor you will never forget. That's Boysenberry!

In tests made by the U. S. Department of Agriculture, 50 berries have been known to fill a quart box; but a conservative number for the average crop would be from 75 to 85 berries.

Boysenberry is a highly profitable crop, and the cost of planting stock is now low enough that you can't afford to wait longer to get started. Plant this year and cash in on a big-money crop. Planted 8 ft. by 8 ft. 680 plants will set an acre.

Boysenberry is perfectly hardy, and may be safely grown in the Northern States, as well as in the South.

Drought Resistant HEALTH BERRY

HEALTH BERRY

This berry was called to our attention by Mr. Hirschi a few years ago when he visited our nursery to look over our outstanding varieties of berries. We have been growing it now for several years and since it has proven to be such an outstanding berry for heavy bearing, sweet delicious flavor and drought resistant, we have started propagating it for customer needs. It is the last berry to ripen and in Texas, Oklahoma, Arkansas, Kansas and Southern Missouri will start ripening the latter part of July and on up into the middle of August. It stands extreme hot temperature and makes a large bush about 4 to 5 feet across. It is thorny but I believe it will prove to be a great fruit along with our other berries. The quality is unsurpassed.

\$0.25	\$1.00	\$1.95	\$4.25	\$8.00	\$14.00

YOUNGBERRY

A wonderful berry produced by crossing the loganberry and dewberry. An exceptionally heavy producer; berries dark wine-red, of extraordinary flavor, tender, juicy and rich, and with no hard core. Unsurpassed for jams and jellies. The demand for this berry has been far in excess of the supply and everyone wants it. Ripens in May and is particularly well suited to this section.

Health Berry

Carman

The All-Purpose Grape

Carman is a vigorous grower and the foliage is seldom attacked by leaf folder or mildew. Very prolific. Clusters large to very large, shouldered or branched, conical, very compact. Is a regular bearer, producing medium, globular, black grapes with thin skin which is tough, never cracking. The pulp is meaty, firm yet tender when fully ripe, has rich quality which is much superior to Concord. The seed readily leaves the pulp. Vines that are 20 years old have been known to bear 17 heavy crops. Carman has been one of the most profitable varieties in many sections of the South and Southwest. The grapes will hang on the vines many days after becoming ripe without deteriorating. Ripens around August 10th. Makes good juices or wine.

PRICES ON CARMAN GRAPE

Small plants: 30c each; 10 at 25c each; 100 at 20c each; 1000 at 15c each, prepaid.

Large plants: 50c each; 10 at 40c each; 100 at 35c each; 1000 at 30c each, prepaid.

MUSCADINE GRAPES

Arbor, Trellis, and Good Eating

BLACK MUSCADINE

Self-fertile male muscadine that is self pollinating and by all means should be planted with Hunt and Scuppernong. The giant size berry with tough skin filled with the sweet tasting flesh is the best you have ever eaten. Price: 3-year-old plants, \$1.00 each; 3 for \$2.50.

HUNT MUSCADINES

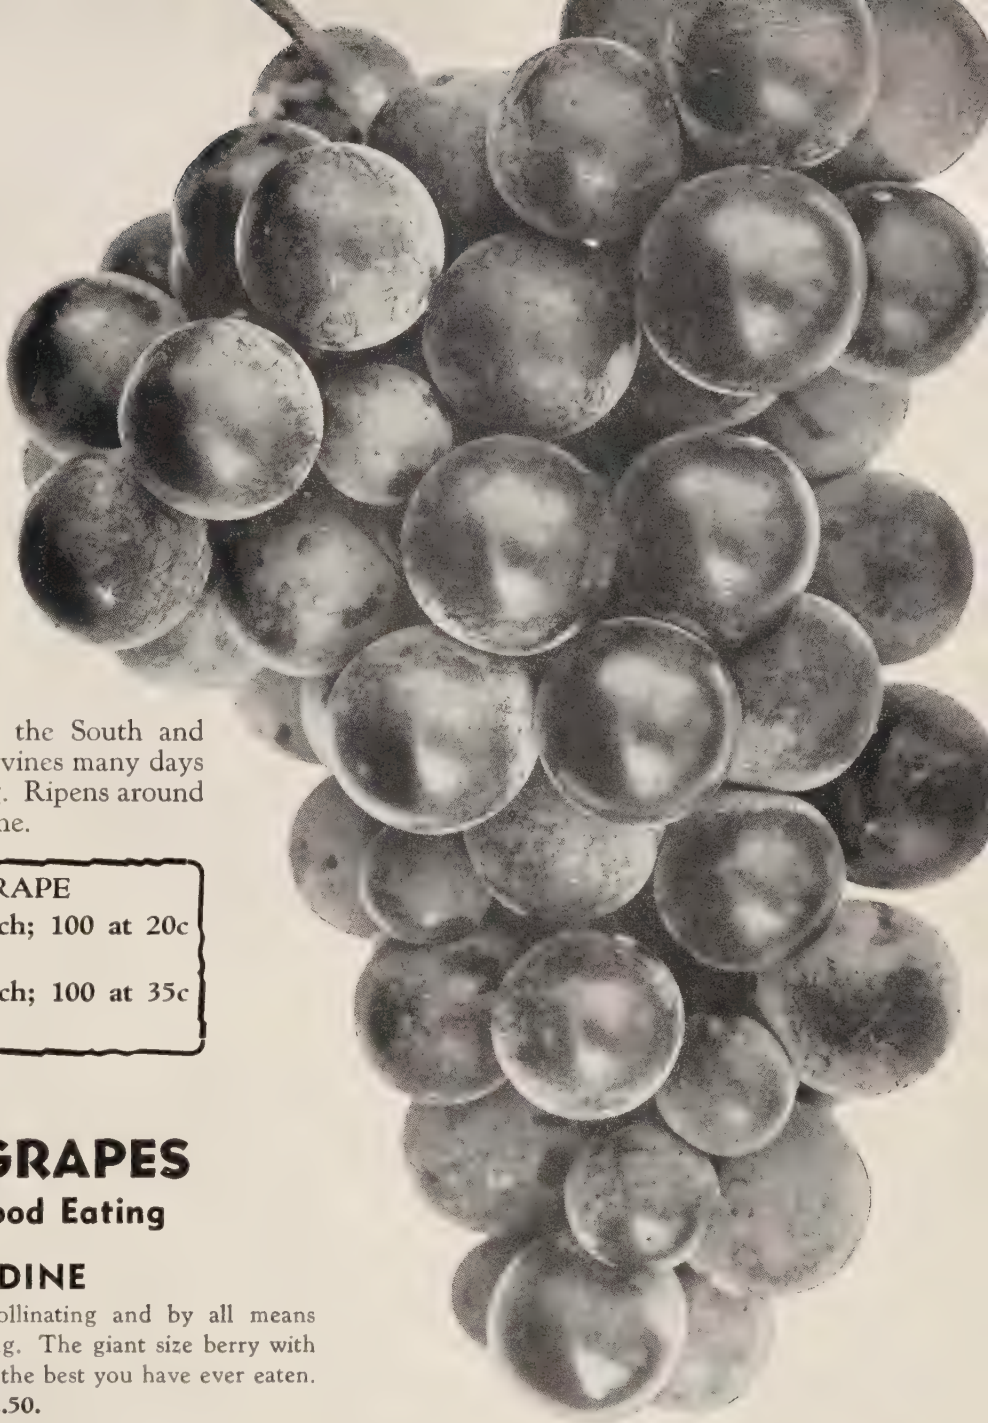

Vigorous grower with healthy foliage. It is prolific and bears regular. Has large black bunches of grapes that hang and has excellent flavor. Ripens in August. Plant with Scuppernong, Black Muscadines for a real combination. Price: 3-year-old plants, \$1.00 each; 3 for \$2.50.

Our Nursery Shipping Season Closes About April 15th.

SCUPPERNONG GRAPE

This outstanding grape is expensive for the nurseryman to grow but ideal for planting around the home and in the vineyard. The bunches are composed of 8 to 10 very large berries, bronze color when fully ripe, with a very outstanding sweet, agreeable, tender flavor. It is excellent for eating off the vine. Ideal for arbors and to grow on fences. Ripens the latter part of August and September. Every home should have two or three Scuppernong vines. Note size of grapes at right. Price: Each \$1.00, prepaid.

One each of the above 3 Muscadines for only \$2.50, prepaid.

ORDER OFFER No. 11

Scuppernong

Black
Spanish

Concord

Niagara

BLACK SPANISH

A very prolific black grape. The clusters are somewhat open but very large. Small tasty berries. It is an excellent grape for jellies, grape juice, and wines. Adapted to the South and Southwest.

CONCORD

Most popular large, purplish black grape. Large shouldered, compact bunch. Flesh is juicy, sweet and tender, excellent flavor. Vine a strong grower, very healthy, hardy and productive. Ripens in August.

NIAGARA

(The Best White Grape)

Has large clumps with large greenish white berries changing to a pale yellow when fully ripe. Flesh is juicy and delicious. Skin is thin but tough, making it ideal for market. Definitely a money maker.

BRILLIANT

Strong grower that endures temperature from 15 degrees below zero to the hottest Southwest weather. Large clusters of light to dark red grapes. Ripens early.

FREDONIA

This new variety ripens three weeks before Concord and has large bunches of blue-black grapes of a very high quality. It is a vigorous grower and high producer in a wide area.

KNOW YOUR GRAPES

The "FOUNDATION OF AMERICAN GRAPE CULTURE" is a large book written by the late T. V. Munson, world famous for his outstanding work on grape culture. This is a book every grape grower should have. It will give you valuable information on planting your grape vineyard, information on growing, preparation of soil, pruning, and harvesting. This big book contains 252 pages with 87 full page illustrations. We only have a LIMITED NUMBER of these books left and are offering them to you at a greatly reduced price of only \$1.50 per copy, prepaid.

PLANTING HELPS

Plant grapes 8 feet apart in the row and in 8-foot . . . This gives 680 grape vines per acre. Planted at 10 feet gives 430 plants per acre and at 12 feet gives 302 plants per acre. Sandy soil is ideal for grape vineyards.

Thompson Seedless

Delaware

America

THOMPSON SEEDLESS

Vigorous growth that produces an abundance of greenish white compact bunches. It is adapted to a wide area and is a favorite on all markets and for eating at home.

DELAWARE

There has probably been a greater acreage planted to Delaware than to any other red grape. Flesh is juicy, very sweet, and of finest quality for both table use and wine making. Ripens early.

AMERICA

A medium size black grape with mottled skin and very hardy, rich in sugar, very drought resistant, disease resistant and a heavy producer.

Grape prices on page 36.

PLANT WOLFE'S ASPARAGUS and RHUBARB FOR BETTER EATING

Asparagus, Washington

MARTHA WASHINGTON ASPARAGUS PLANTS

Introduced by the U. S. Department of Agriculture a few years ago. Has been the main-crop Asparagus variety for home, market, and canning. Produces large, tender, green tips. Famous for its mild, rich, full flavor.

A few roots produce many tips. Plant them 12 inches apart in the garden. In the field, the rows can be 4 feet apart. 5,000 roots will plant an acre. Price: Per dozen plants, \$1.00, postpaid.

VICTORIA RHUBARB

The first plant to furnish fresh sauce for pies in springtime. Will last a lifetime. Will provide lots of juicy stalks after the first year. Plant 2 feet apart. Set the roots straight up and down, with the crown about 2 inches below the surface of the soil. Price: Per dozen plants, \$1.50, postpaid.

Tulip Tree

Mimosa (Silk Tree)

MIMOSA

(Silk Tree)

Has an umbrella-like top, feathery foliage and beautiful, fragrant, pink blossoms in the summer. The leaves fold up at night like a sensitive vine. This is one of our most beautiful trees and is hardy. **Prices:** 2-3 ft., 49c, prepaid, 4-6 ft., \$1.45; 6-8 ft., \$2.25, not prepaid.

RED MAPLE

This magnificent native tree lends great beauty to the landscape in all seasons. The upright branches form a narrow crown and are clothed with green, red-stemmed leaves. In fall the leaves assume a red-orange color, equal in brilliancy to the Japanese maple. Its outline is quite picturesque in winter and in spring the tree is unusually attractive when the branches are lined with reddish or orange flowers. It grows well in many environments. **Price:** 2-3 ft., 35c, prepaid.

Red Maple

Wolfe's Shade Trees

SPECIMEN TREES FOR

CHINESE ELM

I have one of these lovely trees in my yard that is 35 feet high and has a spread of 40 feet. The trunk is 16 inches in diameter at the age of 13 years. **Prices:** 2-3 ft., 45c prepaid. 4-6 ft., \$1.25; 6-8 ft., \$1.95, not prepaid.

TULIP TREE

(*Liriodendron Tulipifera*)

One of the finest of our native trees. Tall growing, stately tree with smooth bark and large, irregularly shaped leaves of glossy green that make it ideal for quick shade. Blooms in late May and early June, bearing numerous tulip-like flowers, 2 to 3 inches long. **Price:** Strong 2-3 ft. trees, 45c each, prepaid.

MAGNOLIA GRANDIFLORA

The grand old large-leaved evergreen Magnolia that produces gaint white flowers of unexcelled fragrance and ornamental seed cones with scarlet-red seed. Adapted to wide range and as far north as Indiana. **Price:** 6-12 inch, 95c; 3 for \$2.50, prepaid.

MOSS LOCUST

(*Robinia Hispida*)

Tree Form Rose-Acacia

The same as shrub Rose-Acacia with the exception that this variety is grown in tree form. Loaded with clusters of pea-shaped, rose-pink flowers during June and July. **Price:** Strong 2-3 ft. trees, 45c each, prepaid.

Majestic Beauty

EVERY PURPOSE

WEeping WILLOW

I have the true Babylonian with branches that hang straight down. Adds an airy touch to a low spot around your home. Plant where it will get plenty of water. Prices: 2-3 ft., 35c, prepaid. 6-8 ft., \$1.95, not prepaid.

SILVER MAPLE

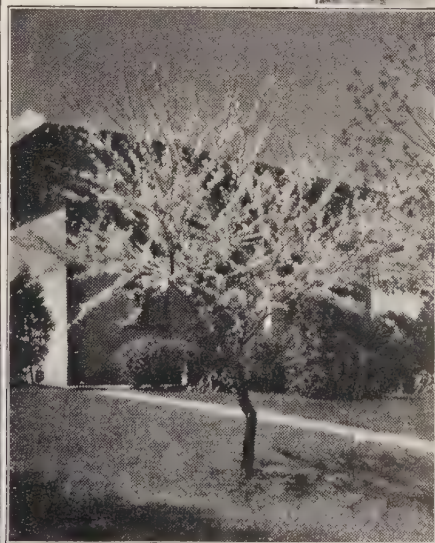

A quick-growing beautiful tree which succeeds in most soils. Leaves light green, showing silvery white beneath, giving a beautiful effect. The tree transplants easily and grows quickly into well-shaped trees desirable for street or lawn. Prices: 2-3 ft., 35c prepaid. 4-6 ft., \$1.25; 6-8 ft., \$1.95, not prepaid.

AMERICAN ELM

This is one of America's most popular and satisfactory shade trees. It is hardy and resistant to root-rot. Grows 50 to 60 feet high. Prices: 2-3 ft., 35c prepaid. 4-6 ft., \$1.25; 6-8 ft., \$1.95, not prepaid.

American Elm

Redbud Tree—Dainty Lawn Specimen

Silver Maple

RED BUD

Spring's early beauty. It blooms in April with a mass of little pink flowers completely covering the limbs of the tree. It is ideal to use as a background in landscaping. Also used extensively in outdoor living rooms. See it in color on page 47. Price: 2-3 ft., 40c each; 3 for \$1.00, prepaid.

AMERICAN SYCAMORE

Tall, stately, beautiful branches, spreading to lend grace to a shade. It often grows 60 feet tall. Prices: 2-3 ft., 39c, prepaid. 4-6 ft., \$1.25; 6-8 ft., \$1.95, not prepaid.

Italian Cypress

Wolfe's Evergreens Propagated by Experts

for Year Around Beauty

BABY EVERGREENS

These baby evergreens are adapted to a large portion of the United States. They transplant safely and are easily shipped by mail or express. They will soon grow into valuable specimen in landscaping your home. Notice the low price and the small amount invested. You will enjoy watching them grow. Each plant is individually root wrapped with peat moss and soil so that they will reach you in first class living condition.

ITALIAN CYPRESS

A tall columnar growing tree with soft, dark green foliage. Will attain 20 feet in height. Use with Pfitzer Junipers on corner and to build up tall lines. **Price: 15-18 in., 85c each, prepaid.**

BAKER'S PYRAMIDAL ARBOR-VITAE

Compact and pyramidal, with dark green foliage. **Price: 12-18 in., 75c each, prepaid.**

BERCKMANN'S GOLDEN

A new dwarf, compact, almost globular Arbor-Vitae with yellow-greenish foliage tipped with gold in spring. Grows to height of 6 feet. A background for the different "color scheme." **Price: 10-15 in., 85c each, prepaid.**

BONITA ARBOR-VITAE

A globe-shaped, dwarf-growing plant with dark green foliage, grows 3 feet high. Lends a graceful touch to an entrance. **Price: 8-12 in., 85c each, prepaid.**

PFITZER JUNIPER

One of the most handsome and popular spreading Junipers. Beautiful silver-green foliage. Ideal for corner planting and for filling in borders. Plant with Italian Cypress for attractive effects. **Price: 6 to 8 in., 65c each, prepaid.**

Baker's Pyramidal Arbor-Vitae

Drive to the Nursery and Save

We have a lot of new and unusual evergreens balled and burlapped that are too heavy to send by mail. If you live within the radius of 200 miles of Stephenville, it will pay you to drive to the nursery and pick up the plants that you need. People tell us that they save more than traveling expenses by driving to the nursery, meanwhile enjoying the pleasant trip and seeing the many outstanding bargains that we have to offer.

Bonita Arbor-Vitae

Berckmann's Golden Arbor-Vitae

WAX LEAF LIGUSTRUM

One of the finest evergreens grown in the South. Leaves very thick and waxy, the upper surface dark green. The aristocrat of the evergreen family. Can be pruned and kept at any desired shape. Useful as hedge or specimens in landscaping. **Price: 9-15 inch plants at 65c each; 3 for \$1.75.**

Pfitzer Juniper

Flowering SHRUBS

The picture at the right shows what can really be done with Wolfe's flowering shrubs. By using a few evergreens for foundation planting you can fill in with flowering shrubs to make a beautiful effect. Look through pages 42 to 48 and select enough flowering shrubs to give you a rainbow of blossoms throughout the year.

NANDINA. A beautiful and popular evergreen with bright red berries, bright red leaves through cold weather. Should be in every planting. Use under windows and mix in with other plants for autumn beauty. Prices: 6-12 inch, 45c each; 3 for \$1.25; 2-year plants, 75c each, prepaid.

YELLOW JASMINE. Its branches are beautifully arched, overhanging the ground from the inner edges. Foliage dark green, covered with gorgeous little yellow flowers all summer. Price: 2-year plants, 75c each, prepaid.

Landscape - Low Cost

MUGHO PINE. A dainty dwarf mound of short candle-like branches which turn to a light green in the spring when new growth appears. Annual pruning keeps it to any size desired without harming the plant. It has dark green needles and is excellent for foundations, terraces or in groups of evergreens and for corners. Twice transplanted. Price: 6 by 6 inches, \$1.25 each; two for \$2.25, postpaid.

EUONYMUS JAPONICA. A waxy, glossy-leaved, hardy evergreen that may be pruned to any shape or will cling to the walls of your home. Ideal for planting with flowering shrubs. Prices: 6-12 inch plants, 55c each; 3 for \$1.25, prepaid.

Evergreens

The picture at the left shows what can be done by planting and keeping pruned a variety of Wolfe's evergreens. The first plant next to the curved walk is a Mugho Pine. This planting contains Pfitzers, Bonitas and a variety of Arbor-Vitae.

You can landscape at low cost with Wolfe's evergreens. Drive to the nursery for large specimen plants, at Stephenville, Texas.

Beautiful - Colorful Rainbow of Blossoms

ABELIA

A beautiful evergreen with glossy foliage that blooms from May until frost with a mass of fragrant white and pink flowers. Silver foliage in the winter. Price: 2-yr., 75c each, prepaid.

ALTHEA (Rose of Sharon)

Beautiful, double flowers in color varieties of rosy-red, white, pink or purple. Produced in profusion from about the middle of July to September. One of the finest and showiest of the mid-summer flowering shrubs. Price: 2-3 ft., 65c each, prepaid.

ALLRED PLUM

As pictured on the front page, Allred Plum will make you a beautiful landscape specimen used with Red Bud for a background. The effect is colorful and you will enjoy sweet delicious Plums right out of your own yard. Prices on front cover.

RED WING

This South American plant from the land of color, is the most outstanding shrub of recent years. A profusion of fiery color the entire summer. Fine for cut flowers because they keep for several days. Only a limited number available this year. Price: 2-3 ft., \$1.00 each, prepaid.

Abelia

Althea

Allred Plum

Flowering Shrubs

Throughout the Year

FORSYTHIA (Golden Bell)

Like the picture this fiery yellow shrub is a splendor of golden yellow flower mass in great profusion in April. Price: 2-3 ft., 65c each, prepaid.

GOLDFLAME HONEYSUCKLE

Blooms every month in the year and is a heavy blooming plant. The beautiful red and rich yellow blooms make a dainty tassel for the shapely bush. Price: 1-2 ft., each 95c; 3 for \$2.75 prepaid.

FLOWERING PEACH

Red or white. One of our most beautiful ornamental trees. It is completely covered with double Carnation-like blossoms in the spring followed by glossy green foliage. It is a beautiful shade tree that is most often used for background planting. Price 2-3 ft., 65c each, prepaid.

PYRACANTHA (Lelandi)

Commonly called Firethorn. Tall, upright growing evergreen covered with orange berries during the winter months. Leaves are dark shiny green. Endures extreme cold. Price: 9-12 in., 60c each, prepaid.

BARBERRY, RED-LEAF

There is nothing so strikingly brilliant in hardy shrubbery as our genuine true red strain of Red Leaf Barberry. Its abundance of thick, purplish maroon leaves glisten in the sun, contrasting with the green and yellow of other plants. Valuable for single specimens, corner groups, and solid border hedges. Price: 9-12 in., 55c, prepaid.

Flowering Peach

Wolfe's Flowering Shrubs

More For Your Dollar

WISTERIA (Purple or White)

Magnificent climber and becomes more beautiful each year. Can be trained to make a tree. Will bloom the first year. We have the most popular purple or white. Price: 1-yr. plants, 55c each, prepaid.

BRIDAL WREATH

Without doubt one of the most useful and most widely used shrubs in cultivation. Blooming in April and May, the plant throws out long branches that curve and droop to the ground, weighted with a mass of pure white flowers that suggest a fountain of snow. May be used for specimen, massed, or for hedges. Price: 2-3 ft., 60c; 3 for \$1.50, prepaid.

QUEEN'S WREATH VINE

A long, slender vine that produces racemes of pink flowers in a grapelike cluster. Blooms from midsummer until late frost. Price: 2-yr. vines, 35c each; 3 for \$1.00, prepaid.

CYDONIA JAPONICA

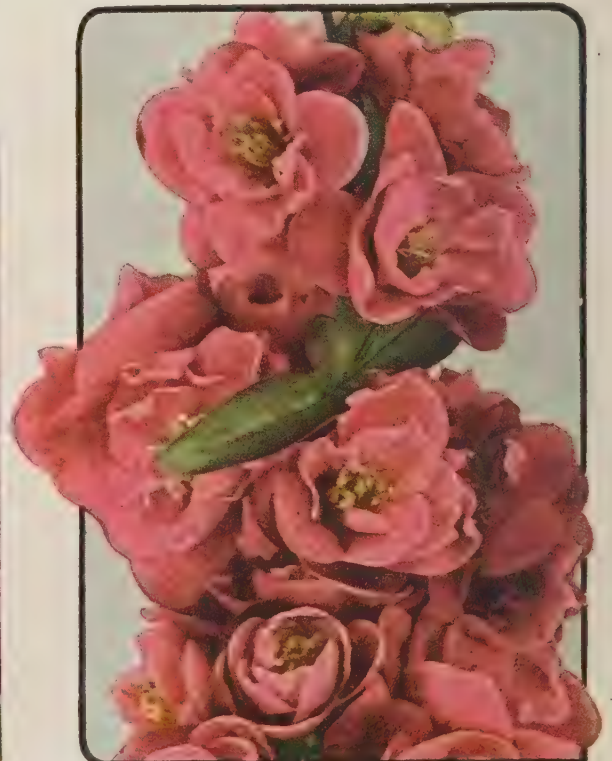

An aristocratic shrub that attains height from 4 to 6 feet and is one of the earliest shrubs to bloom. The beautiful salmon-red blooms appear in masses all over the spinous extended branches before the leaves are out. This mass of red blossoms remains for a long period of about three weeks. It is extremely hardy and may be used as a fill-in plant with wonderful effects. Price: 1-2 ft. plants, 75c each, prepaid.

Purple Wisteria

Bridal Wreath

Cydonia Japonica

Easy To Plant in Colorful Shrubs

CRAPE MYRTLE

Beautiful fringed flowers borne in large panicles from July to November. For best results cut the tops back to a height of 1 to 3 inches above the ground after transplanting. White, pink or watermelon red. Price 1-2 ft., 35c each; 3 for \$1.00, prepaid.

PHOTINIA (Holly Leaf Type)

One of our most beautiful broad-leaved evergreens. The leaves are dark, broad, long, with serrate edge. Beautiful yellow, fragrant flowers in the spring. Price: 6-9 inch plants, 55c each, prepaid.

PINK ALMOND

Is a lovely shrub that will provide a dainty shade of color to your landscape. Adapted anywhere. Prices: 1-2 ft. plants, 65c each, prepaid.

WEIGELA (Rosea)

Graceful, arching spread of beautiful blooms; foliage arranged by nature as a bouquet. This pink lady should be planted in part shade. Price: 2-3 ft., 45c each; 4 for \$1.50, prepaid.

Crape Myrtle—Red, Pink, and White

Weigela Rosea

Pink Flowering Almond

Hardy
Gardenia

Purple
Lilac

GARDENIA

Needs no description. As shown above, this variety is a heavy blooming plant that will produce all summer. We have been growing this variety for several years and it has proven to be a better Gardenia than any other kind. Grows very fast. Prices: 9-12 inch plants, 75c each; 3 for \$2.00, prepaid.

DOGWOOD

Pink or White

As pictured below, it makes a beautiful, graceful tree that lends itself well to lawn planting. It blooms early before the leaves put out and does well in wide climatic areas. Prices: Pink, 2-3 ft. trees, \$1.95 each. White, 2-3 ft. trees, 75c each.

Dogwood—Pink and White

LILAC

Common purple as both you and I have known for many years. I have the original pure strain that grows tall and is covered with large blossoms that only Mother Nature can provide. It can be used as an informal hedge or as a flowering shrub under high windows. Prices: 1-2 ft. plants, 55c each; 3 for \$1.50, prepaid.

CORALBERRY

A native shrub which is dwarfish in growth, very hardy, and drought-resistant. Has small, insignificant flowers in the spring and a wealth of coral berries in late fall and winter, remaining until spring. Prices: 1-2 ft. plants, 30c each; 4 for \$1.00, prepaid.

Coralberry—Symphoricarpos

Red Bush Honeysuckle

HONEYSUCKLE (Red Bush)

From June to October it is covered with hundreds of scarlet flowers. Excellent for borders. Price 2-3 ft., 40c each, prepaid.

HONEYSUCKLE VINE

This is an evergreen Honeysuckle that is covered with bright yellow and white fragrant flowers. It is a beautiful plant for arbors and trellis. Price: 2-year vines, 45c each; 3 for \$1.00, prepaid.

RED BUD

Spring's early beauty. It blooms in April with a mass of little pink flowers completely covering the limbs of the tree. It is ideal to use as a background in landscaping. Also used extensively in outdoor living rooms. See it in color below. Price: 2-3 ft., 40c each; 3 for \$1.00, prepaid.

Red Bud

Mock Orange

MOCK ORANGE

This beautiful plant blooms in May and June, and almost any day during the summer one can see flowers. Mother Nature's perfume of the garden. Price: 2-3 ft., 35c each; 3 for \$1.00, prepaid.

PYRACANTHA (California)

Commonly called the Fireball. Tall, upright, and literally covered with red berries during the winter months. Used in specimen plantings. Price: 9-12 in., 65c each, prepaid.
